CHANGES IN FARM PRODUCTION AND EFFICIENCY

ANNUAL SUMMARY, 1955

SUPPLEMENT III

U. S. DEPARTMENT OF AGRICULTURE

Index numbers of farm production per man-hour by groups of livestock and crops for each geographic division, 1919-54

UNITED STATES DEPARTMENT OF AGRICULTURE
Agricultural Research Service
Washington, D. C.
June 1955

The purpose of this supplement is to provide additional data on changes in farm production per man-hour in each geographic division. The desirability of limiting the size of the main publication prevented their inclusion in it. Yet, many people are interested in the trends in farm labor productivity in different parts of the country.

Two additional supplements are available.

Supplement I contains nine regional tables of index numbers of farm production for each of the groups of livestock and crops shown in table 1 in the main publication.

Supplement II contains nine regional tables of index numbers of man-hours of farm labor used for each of the groups of livestock and crops shown in table 12 in the main publication.
